

EXCLUSIVE LISTING STRATEGY · PREPARED FOR THE VIRGINIA TECH FOUNDATION

803 Grove Avenue

A 1955 brick ranch four minutes on foot from Blacksburg's recreation corridor, directly facing the old high school redevelopment across Grove Avenue.

STARTING PRICES, NEW TOWNHOMES ACROSS
THE ROAD

THE OPPORTUNITY

The lowest-priced entry to one of the most funded blocks in Blacksburg.

Directly across Grove Avenue from this front yard, the old high school site is cleared and about to break ground: up to 73 townhomes priced from the \$600s, with roughly 20 acres staying public as parks, trails, and ballfields. I represent the developer building it, so I know exactly what is coming and when. Zillow puts the typical 24060 home at \$434,185. Homes here sell at 99.2 percent of asking, in a market with about 3.6 months of supply. My job is to make sure the Foundation captures every dollar that investment adds to this address, and my plan below shows two clean paths to do it: list as-is at \$335,000 and let investor demand compete, or invest \$52,500 with my contractor team and list at \$450,000 or above.

Either way, I will not market this listing to Blacksburg alone. I will put it in front of Hokie Nation: 299,415 living alumni, including more than 60,000 in greater Washington and active chapters in Tidewater and the Peninsula, through my network in Northern Virginia, Virginia Beach, and the Lunch Pail Ventures community.

Brick, hardwood, and a yard the new construction can't match

Solid 1955 bones in Blacksburg Heights. Original oak floors run under most of the main level, the layout is the classic three-bedroom ranch buyers ask for, and the primary bedroom has its own full bath, a rarity at this vintage.

ADDRESS	803 Grove Ave, Blacksburg, VA 24060
OWNER	Virginia Tech Foundation Inc (deed of gift, June 2026)
STYLE	One-story brick ranch, built 1955
BEDROOMS	3
BATHS	2 full (hall tub bath, shower bath off the primary suite)
ABOVE-GRADE AREA	1,369 SF
BASEMENT	Full and unfinished, a blank slate for future finished space
LOT	Blacksburg Heights · R-4 low density residential
HEAT / COOL	Heat pump with central air
EXTRAS	Fireplace, rear deck, 10x10 shed (2003), mature shade trees
2026 ASSESSMENT	\$247,600 (\$60,000 land / \$187,600 improvements)

The house presents exactly the way a value-add buyer hopes: cosmetically tired, structurally honest. The kitchen and both baths are original-era and price into any offer. What does not need buying: brick exterior, gable roof, hardwood, the mechanical basics, and a genuinely

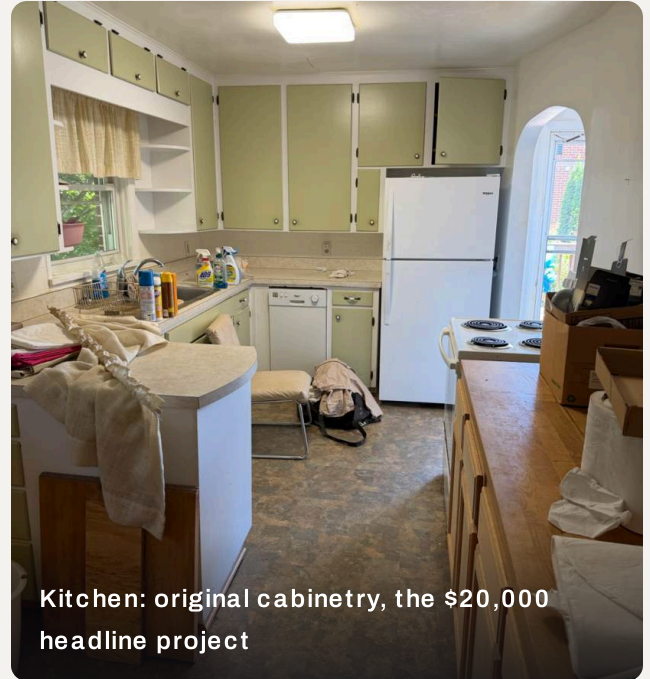

large back yard shaded by mature trees.

WHAT THE COUNTY CARD MISSES

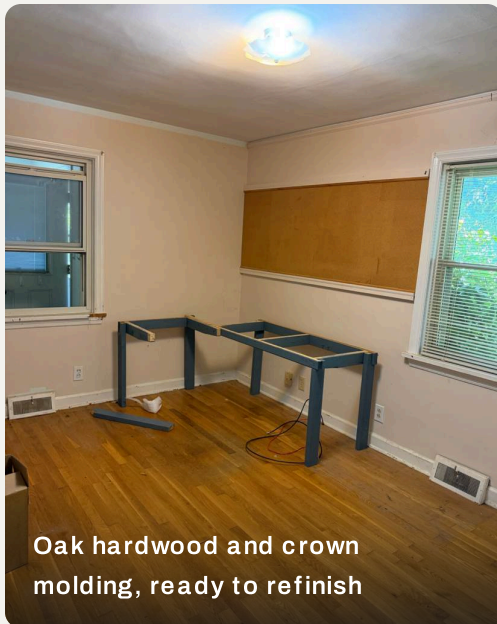

The Montgomery County record shows one full bath. There are two: the second is a shower bath off the primary suite, effectively a primary suite the assessment does not know exists. Neither does the size of the back yard. Buyers relying on public records will underestimate this house, which is precisely why the marketing has to lead with photography and a corrected fact sheet, and why the assessment is a floor, not a signal of value.

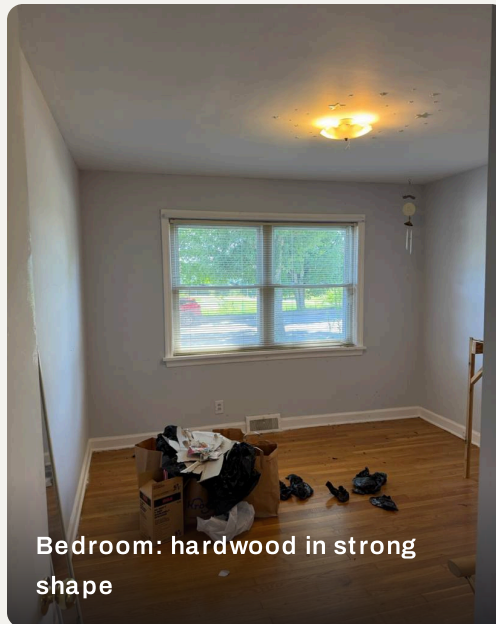

The face buyers fall for: brick, shutters, big trees

Kitchen: original cabinetry, the \$20,000 headline project

Oak hardwood and crown molding, ready to refinish

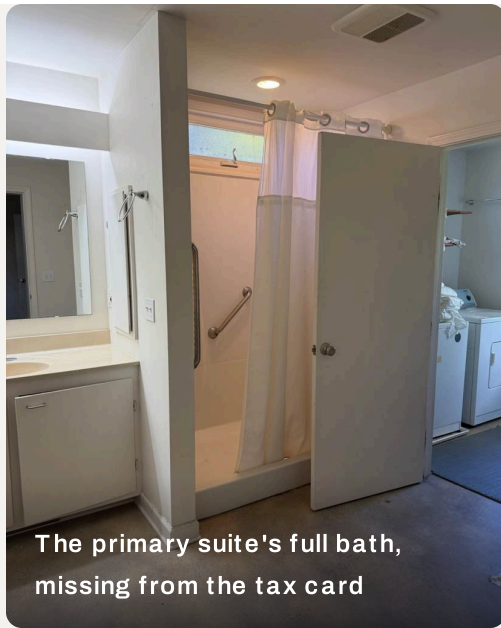

Bedroom: hardwood in strong shape

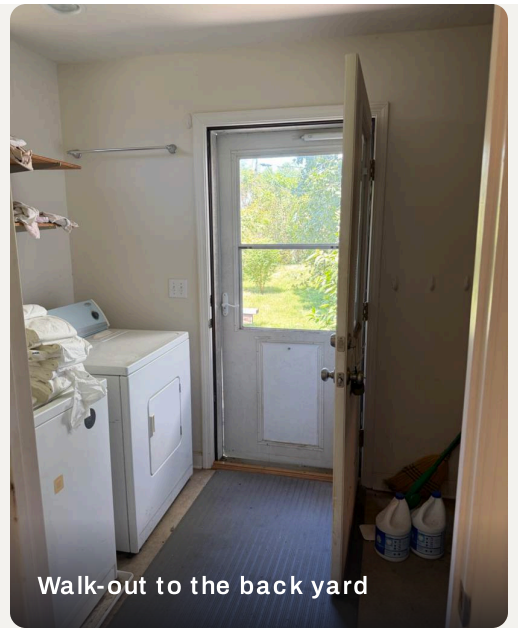

Light-filled second bedroom

Main bath: full gut planned in the \$15,000 bath budget

The primary suite's full bath, missing from the tax card

Walk-out to the back yard

Four minutes on foot from the town's whole recreation corridor

Grove Avenue at Patrick Henry Drive is the quiet edge of a block drawing serious public money. Pool, gyms, 35-acre park, and the track are already a short walk. What comes next directly across the street is the case for listing now.

4 min

WALK

Blacksburg Aquatic Center

Downtown Blacksburg

1.4 mi, Main Street dining and shops

6–8 min

DRIVE

Virginia Tech and Lane Stadium

Campus 2.0 mi, stadium 2.3 mi, walkable on a game day at 45 minutes

ACROSS THE ROAD, RIGHT NOW

The old high school site is about to break ground

The former Blacksburg High School is gone and the site is cleared, with grading ahead of construction next. Approved for the parcel: up to 73 townhomes expected to start around \$600,000 to \$650,000, while roughly 20.6 acres stay public, with parks, connected walking and biking trails, and the existing track, ballfields, and pickleball courts remaining. The town is even studying this site for a major new recreation facility.

I represent the developer of this project. The Foundation gets a broker with first-hand knowledge of what is being built across the street and on what timeline, and the house across the street from \$600K new construction is the cheapest way to own the block.

73

Townhomes approved, from the \$600s

~20.6 ac

Staying public: parks, trails, track, ballfields

2

New park areas planned, plus trails and crosswalks

Blacksburg is short on homes. Virginia Tech is never short on demand.

A record 31,536 undergraduates, the county's largest employer, and a town that permits fewer homes than it needs. That is the backdrop for pricing this house with confidence.

The comps tell one story: condition is the only thing separating \$220K from \$435K

I pulled the sales that matter: dated originals and finished renovations of the same vintage, in the same north-Blacksburg pocket. The gap between the two groups is the whole strategy.

Recent comparable sales and pendings near Grove Avenue

Dot position is list/sale price. The maroon marks are my pricing opinion for 803 Grove in each condition.

PROPERTY	CONDITION	STATUS	BEDS/BATHS	FIN. SF	PRICE	\$/SF

803 Grove Ave, renovated	SUBJECT	Proposed	3/2	1,369	\$450K+	\$329+

Comparables pulled from the New River Valley MLS, August 2026. [View the live comp set](#). Subject figures are my broker price opinion, not an appraisal. The as-is recommendation of \$335,000 sits well above both original-condition sales on the strength of the second full bath, the basement, the larger main-level footprint, and the position facing the redevelopment, inside a supported band of \$325,000 to \$350,000; the renovated target draws on a renovated group running \$279 to \$310 per finished foot, plus the \$600K new-construction anchor across the street.

WHY THE SUBJECT'S PRICE PER SQUARE FOOT RUNS HIGHER

Every finished foot at 803 Grove is above grade, on a single main level. The larger comparables spread finished space onto second floors or below grade, which an appraisal grid discounts against main-level area, and the smallest renovated comps post \$289 to \$310 per foot because small homes always price high per foot. Valued the way an appraiser actually values it, the subject's 1,369 main-level feet deserve a premium to the group's blended price per square foot. That appraisal logic is exactly how the \$335,000 as-is number and the \$450,000 renovated target are built.

SAME HOUSE · RENOVATED

\$372,900

Re-listed as a 3 bed, 2 bath and
went pending at full
renovation pricing

That is the same house, months apart. The market has already run this experiment for us. 803 Grove starts with more square footage above grade, a second bath already in place, and the town's biggest redevelopment directly across the street. The question is not whether the renovation math works in this pocket. It is whether the Foundation wants to capture that spread itself or hand it to an investor.

If you renovate: \$52,500 in, about \$62,500 more out, and I manage all of it.

Most sellers in the Foundation's position choose as-is, and this plan is built for that. But the decision deserves the full picture: four well-chosen projects, priced from my experience with renovations small and large in this market, coordinated by me with contractors I have vetted on my own projects.

Kitchen, full refresh

\$20,000

New cabinets, counters, appliances, lighting. The single highest-leverage dollar in the house.

Both baths

\$15,000

Hall tub bath and the primary suite's shower bath, fixtures to finishes.

Flooring

\$10,000

Refinish the oak that is already there, new flooring where it is not.

Paint, whole interior

\$7,500

Every wall, ceiling, and trim line, one cohesive palette.

TOTAL SCOPE

\$52,500

Figures are planning estimates from my own renovation projects in this market, firmed up with contractor bids before any commitment. The Foundation approves every line.

THE LIKELY PATH

Path A: Sell as-is

List immediately, ahead of the September home slate

List price	\$335,000
------------	------------------

Renovation cost	\$0
-----------------	------------

Timeline to contract	Weeks, not months
----------------------	--------------------------

Likely buyer	Investor / value-add
--------------	-----------------------------

Indicative proceeds	~\$335,000
---------------------	-------------------

Fast and clean, and the rest of this plan is built around it. The trade-off: the renovation spread goes to the buyer.

Path B: Renovate, then list

6 to 9 weeks of work, list into the October game slate

List price	\$450,000+
------------	-------------------

Renovation cost	-\$52,500
-----------------	------------------

Timeline to contract	List mid-October
----------------------	-------------------------

Likely buyer	Owner-occupant / alumni
--------------	--------------------------------

Indicative net	~\$397,500+
----------------	--------------------

About \$62,500 of additional net versus Path A, if the Foundation ever elects to capture the spread itself. Presented for your information; no work happens before the listing agreement, and none without your written approval.

The renovation math, plainly

$$\begin{array}{ccccccc} \$450\text{K+} & - & \$52.5\text{K} & - & \$335\text{K} & = & \approx \$62.5\text{K} \\ \text{RENOVATED RESALE} & & \text{RENOVATION SCOPE} & & \text{AS-IS VALUE TODAY} & & \text{ADDITIONAL NET} \end{array}$$

WHY I CAN RUN THIS SCOPE

I have managed renovations small and large on my own projects for years. The contractor list I would put on this job, kitchen and bath crews, flooring and refinishing, painters, is the same one I use when my own money is on the line. The Foundation gets one point of contact, weekly progress reports with photos, and a scope that is built to appraise, not to impress a magazine.

Listed in Blacksburg. Marketed to Hokie Nation.

Local MLS exposure is table stakes and I will execute it flawlessly. The plan that earns this listing is what happens beyond the New River Valley, where the buyers with the deepest attachment to this town actually live.

PHASE 1 · THIS WEEK

Ready to list

- **Nothing is waiting on the house:** the Foundation's pre-list punch list is already complete
- **Professional media:** architectural photography, video walkthrough, 3D tour, drone of the corridor and the redevelopment site
- **Corrected fact sheet:** two full baths and the primary suite bath on record, so no buyer anchors on the county card
- **Paperwork to live listing in days,** not weeks

PHASE 2 · LAUNCH AND REACH, TOGETHER

Every market at once

- **New River Valley MLS** with day-one syndication to Zillow, Realtor.com, Homes.com and every major portal
- **Dedicated property website** for the address, live at launch
- **Direct outreach** through my Northern Virginia and Virginia Beach networks and the Lunch Pail Ventures community
- **Targeted digital** to VT alumni audiences in the DC metro and Hampton Roads
- **Weekly reporting** to the Foundation: showings, saves, ad reach, feedback, and my read on price

THE DIFFERENTIATOR

The buyer for this house probably does not live in Blacksburg yet

Southern Living just profiled the trend: alumni buying second homes back in their college towns, and Blacksburg by name. The 24060 market already prices that demand. My plan puts 803 Grove in front of it deliberately, as a game day home, a future retirement landing spot, or a house for a student with parents who would rather build equity than pay rent.

299,415

Living Virginia Tech alumni, all 50 states

60,000+

Hokies in greater Washington, DC, my Northern Virginia network's home turf

27,365

Alumni in the DC Metro chapter alone

9,000+

Alumni around Virginia Beach, Norfolk, and Chesapeake, per the Tidewater chapter

HOW I REACH THEM

- **Northern Virginia:** direct outreach and referral partners across the DC Metro and Loudoun alumni communities, over 34,000 chapter-counted Hokies
- **Virginia Beach and Hampton Roads:** the Tidewater and Peninsula chapter communities, where game-weekend trips west are a way of life
- **Lunch Pail Ventures:** the private network of VT alumni founders and investors, Blacksburg-based, where I know the members already putting money into this town
- **Alumni-targeted digital:** paid social and search aimed at VT-affiliated audiences in 20147, 22030, 23451 and the corridors between

WHAT THEY ARE BUYING

- **A game day base** six home Saturdays a year, walkable to the pool, park, and track, 8 minutes from Lane Stadium
- **A student home:** 3 bedrooms, R-4 allows up to 3 unrelated occupants, with 3BR rents near \$1,900 to \$2,400 covering carry
- **A long-term hold** in a corridor the town itself is investing millions into, next to \$600K new construction
- **Not an Airbnb play:** Blacksburg restricts short-term rentals to owner-occupied homestays, so I market this on use and equity, never on Airbnb math that will not survive a permit check

2026 home slate at Lane Stadium, kickoff times TBA. An August as-is listing runs straight into this calendar, and every open house lands when Blacksburg's hotel rooms are sold out and 65,000 Hokies are in town. Alumni figures: Virginia Tech Magazine, Spring 2026 reporting of Spring 2025 data, and dcare.vt.edu. Lunch Pail Ventures is an independent alumni organization; references reflect my professional relationships, not an endorsement.

Media that sells the corridor

Drone footage framing the house against the park, pool, and redevelopment site. The story is the block, and photos of a kitchen cannot tell it.

A listing page built to forward

Like this one. Every alumni inquiry gets a link that makes the case in 90 seconds, not an MLS printout.

Reporting the Foundation can file

Weekly metrics: showings, portal saves, ad impressions by market, and a written pricing read. No surprises at the 30-day mark.

07 · YOUR LISTING TEAM

A local broker with renovation experience and reach across Hokie Nation.

I am Austin Cummings, Principal Broker and founder of GRAVITY Real Estate Group, based at 751 University City Boulevard in Blacksburg. I represent property across the New River Valley from \$140,000 starter homes to \$2,000,000 estates, and I have managed renovations small and large, which means the Foundation gets a broker who can price a kitchen from a walkthrough and hold a contractor to a bid.

GRAVITY puts its name on this community, from sponsoring adoption fees to Thanksgiving meals for 300 neighbors, and we grow by doing the unglamorous parts of this job: preparation, communication, and follow-

through.

Principal Broker

GRAVITY Real Estate Group, Inc.

\$140K to \$2M

Active range of represented listings

Renovation experience

Small and large projects across the NRV

Network

NoVA and Virginia Beach alumni communities, Lunch Pail Ventures

The Foundation should expect its broker to treat a \$325,000 ranch with the same rigor as a \$2,000,000 estate. This document is what that looks like.

Three decisions, and I handle everything after

Step 1

Confirm the path

As-is at \$335,000 is the likely call, and everything is ready for it. The \$52,500 renovation option stays on the table for about \$62,500 more in net proceeds, with bids to firm it up whenever you want them.

Step 2

Sign the listing agreement

Standard exclusive right to sell. Commission and terms presented transparently alongside both pricing scenarios.

Step 3

Go live

The house is ready and the punch list is done, so the listing goes live within days of signing. If the renovation option were ever chosen instead, work would finish in early October and list into Homecoming weekend.

Austin Cummings, Principal Broker
